Shivani Devkota

Giralang, ACT, 2617

Career Objective

Creative and highly reliable Software Developer looking for a Software and Application Developer position with a focus on web application development. I would like to apply my excellent coding and problem-solving skills to create web applications based on the client's technical and design specifications. With previous experience in customer-facing roles, I will bring strong customer service, communication and time-management skills to this position.

Technical Expertise

Programming Languages:	PHP, ReactJS, JavaScript, jQuery, AngularJS, CSS/SCSS, Ajax, HTML5, XML, SQL
Frameworks:	Ruby on Rails, BootStrap, Code Igniter, Amazon Web Services, Ruby on Rails
Computer Systems:	Windows XP /7/10, Linux /Ubuntu
Computer Software:	Apache Web Server, Microsoft Office (Word, Excel, PowerPoint)
UI/UX Tool	Invision, Adobe Photoshop, Proto.io

Personal Attributes

- Strong web application development, problem-solving skills and research skills developed during doing work with Saras Care and Bajra Technologies.
- Absolute team player nevertheless can work independently when needed. For instance, collaborated with developers, designers and other staff on multiple projects while working at Bajra Technologies.
- Effective communication skills developed through liaison with clients at Saras Care, Bajra Technologies and in other part-time jobs.
- Strong time management skills demonstrated during the placement by completing all tasks on time

---
